CONNECT

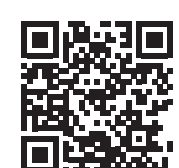

Rewiring entrepreneurial ecosystems so inclusion becomes the norm

Many entrepreneurs across North-West Europe have experience, networks and market knowledge, yet they struggle to access finance, advisory services and mainstream business networks. For migrant entrepreneurs, those barriers are even harder to overcome. Their potential remains underrecognised, and ecosystems fail to fully benefit from existing talent.

CONNECT is changing that story. By bringing regions together to learn from each other, the project is building inclusive support ecosystems for migrant entrepreneurs. This marks the start of an ecosystem shift, where diversity drives regional growth.
